Pageviews	73,360
Previews	16,708
Clicks	32,499
Bounce Rate	32.6%
Click Through Rate(CTR)	44.3%
Review Rate	22.8%
Avg events per session	18.7

Analysis & Observations

Daily event Volume

Gradual Decline Trend

Traffic peaked August 19 and declined ~15% by August 25 — suggesting post-campaign decay.

Steady Daily Traffic

Pageviews averaged ~20,300 daily — indicating stable, consistent engagement.

Daily Unique Users

Stable Engagement but Low Preview Activity

Pageviews averaged 20,300 daily indicating stable, consistent engagement throughout.

Declining Unique Users

Users peaked August 19 and dropped steadily flagging a retention opportunity.

Top 10 Landing Tracks

Single Track Dominance

Jalebi Baby drives 6.2 % of all pageviews(4,476) — a clear dependency risk for the platform.

Diverse but Uneven Traffic

Other top tracks Beautiful (2,296), Beautiful Day (2,138), a — fall behind Jalebi Baby', i.e, an imbalanced content spread

Top 10 Landing Tracks by Pageviews

User Journey Funnel

➤ Preview Stage is Under Utilised

Only 22.8% of visitors triggered a preview — a significant drop-off and the biggest untapped conversion opportunity.

➤ High Intent Users Convert Well

44.3% clicked through to streaming, proving strong conversion among engaged users.

User Journey Funnel

Top Exit Pages (Most Clicked)

Jalebi Baby Dominates End-to-End

Jalebi Baby leads with **2,266 clicks**, heavily outperforming *Beautiful Day* (**1,062**) and *Beautiful* (**940**).

Hidden High Converters

Calabria and Late At Night convert strongly relative to their traffic — high potential with better promotion.

Pageviews VS Clicks

Conversion Underperformers

So Pretty and Candy Shop draw strong traffic but convert below average — prime CTA optimization targets.

Conversion Overperformers

Calabria and Late At Night convert well above their traffic rank — hidden high performers.

Geographic Analysis-Top 10

Top 10 Countries by Pageviews

Truly Global Traffic

Traffic from 212 countries in 7 days — confirming a truly global audience.

MENA & South Asia Lead

United States & India drive ~40% of traffic — South Asia and MENA offer strong localization growth potential.

Click Through Rate by Country

Click-Through Rate by Country

Nigeria Leads in Conversion

Nigeria shows the highest CTR (~56%) among all markets, followed by Pakistan and Saudi Arabia.

Localization Gap in MENA

Poland and UAE show the lowest CTR (~41–42%) among high-traffic markets, suggesting potential content-audience mismatch.

Bounce Rate By Country

➤ Moderate Overall Bounce Rate
At 32.6%, the platform retains users well. High-bounce markets highlight targeted re-engagement opportunities.

➤ Teshar Dominates Artist Traffic
Teshar leads artist pageviews by a substantial margin driven entirely by Jalebi Baby's viral performance.

Top10 Artists by Pageviews

Key Insights

➤ **Strong Overall CTR (44.3%)**

Users with intent convert at a high rate — well above industry averages for music discovery platforms.

➤ **Healthy Bounce Rate (32.6%)**

Over 67.4% of sessions result in meaningful engagement beyond the landing page, reflecting strong content-audience alignment.

➤ **Single-Content Dependency Risk**

Jalebi Baby alone drives 6.2% of all pageviews, creating significant traffic dependency on a single track

➤ **Critical Preview Funnel Gap (22.8%)**

Only 1 in 4 users triggers a preview despite it being the strongest conversion signal — the single biggest untapped opportunity.

➤ **Geographic Concentration**

United States + India = ~40% of traffic. Poland and UAE show the lowest CTR (~41–42%) among high-traffic markets, pointing to a content-audience mismatch.

Weekly Traffic Decay (~15%) Consistent decline Thursday through Sunday suggests campaign-driven spikes rather than organic growth.

Conclusion

- Sessions — Unique (linkid date) pairs with a pageview event — total: 6,554sessions.
- Unique Users — Unique linkids across the dataset — total: 3,839 users.
- Bounce Rate — 32.6% of sessions had a pageview with no follow-up click or preview. 67.4% engaged further.
- Avg Events per Session — Users generated an average of 18.7 events per session, indicating strong engagement among active users. .
- User Flow —“User Flow — Pageviews dominated engagement, while preview interactions remained comparatively low, highlighting a key optimization opportunity.”

5.Recommendations

01 · Activate the Preview Funnel

Only 22.8% of visitors trigger a preview the biggest untapped conversion opportunity .Add a 'Preview' button above the fold on all landing pages to nudge visitors into active listeners before they click through.

02 · Reduce Single-Track Dependency

Jalebi Baby drives 6.2% of pageviews — creating heavy dependency on a single track. Build a 'You Might Also Like' module to distribute traffic more evenly across the catalogue

03 · Localize for MENA & South Asia

Saudi Arabia, India, Iraq, and Pakistan drive a major share of traffic and convert well — localized Arabic and Urdu/Hindi CTAs could unlock even higher conversions

04 · Flatten Mid-Week Traffic Decay

Traffic drops ~15% Thursday to Sunday. Schedule "Weekly Picks" newsletters and push notifications on Wednesday–Thursday to stabilize traffic within $\pm 5\%$ of the weekly average.

05 · Re-Engage Bouncing Users

2,137 sessions (32.6%) are single-event bounces, highlighting the need for stronger re-engagement strategies and better content discovery mechanisms.
